

# SUSTAINABLE AND MEASURABLE IMPROVEMENT OF YOUR COMPANY'S FUTURE VIABILITY

## Successful "Lean" is an expert's task

The Lean Institute® Germany was founded in 2001 and defines itself as a balance-effective consulting company geared towards success. We have supported some very well-known customers in a large number of Lean projects with measurable success. The combination of western management methods (Leadership, Change Management, Policy Deployment, Management Review Systems, Operational Excellence, etc.) with Asian improvement techniques (Kaizen, Toyota Production System, Hoshin Kanri, Twenty Keys, etc.) is at the heart of our approach. Top-down and clear management objectives are combined with a bottom-up and solid practical basis. However, our Lean best practice concept is "Made in Germany". This is world-wide unique.

## Correct use of the lever for measurable success

Only 20% of the lever for continuous improvement of the company results and culture is made up of the instruments, methods and tools of "Lean Production". 80 percent of the improvement lever consists of management processes, focusing on the correct objectives and centrally changing the way management sees itself.

This "Change" subsequently leads to measurable success in the day-to-day goal-driven action of the executive personnel with our Best-Practice approach.

- ◆ **Lean Leadership, Change Management**
  - ◆ Values, philosophy > Kata

  - ◆ Sales and Operations Planning

## Criteria for the success of Lean: the management of Lean is absolutely critical

Improved performance, excellent efficiency and flawless product quality can only be achieved on a sustained basis if the factors personnel/people, organization, processes and measurability are in perfect harmony. It is this dovetailing, this holistic systematic approach, which brings success.
